

Virtualizing IBM/Lotus Domino

Introduction

[Eric Siebert](#) is a Domino Guru and also a VMware guru, as well as the guy that runs <http://vsphere-land.com>, and he's written a great article on [IT Knowledge Exchange](#) about the realities of running Domino on ESX.

His article was driven by a couple of IBM support articles that discourage folks from virtualizing Domino, and he explains how to do it properly and Not Be Afraid.

Intended Audience

IBM/Lotus Domino administrators and VMware Certified Professionals, when considering virtualizing Domino.

Outline

- [The Key to Successfully Virtualizing Domino Servers](#)
- IBM Support Post 1: [High CPU usage by router and poor performance of Domino under VMware](#)
- IBM Support Post 2: [Poor performance of Domino HTTP server on VMware ESX 3.0 and 3.5](#)
- [How to size Domino and Sametime systems for full production loads on VMware ESX Server](#)
- [Benefits of virtualizing Lotus Domino servers](#)
- [Ensure maximum performance from virtualized Lotus Domino servers](#)
